XM Dockable and Floating Dialogs

Many dialogs can now be docked to create tabs in the MicroStation application window. These tabbed dialogs can be resized with the maximized view. The dialogs including the Toolsettings window can also be dragged outside the MicroStation application window.

[Tool Settings] [Project Explorer] [**Level Display**] [Element Information]

To add the dialogs to the tab layout; click, hold, and drag the dialog to the edge of the MicroStation application window. The dialog will then resize and show a shaded area representing the tab. Release the mouse button to finish adding the tab.
